EDUCATION

Bachelor of Technology in Computer Science Engineering Krishna Institute of Engineering and Technology(AKTU), India CGPA: 9.08	2024 – 2028
Class XII – ICSE Board Percentage: 93%	Passed: 2024
Class X – ICSE Board Percentage: 97.15%	Passed: 2022

Technical Skills

Languages: Java, Python, JavaScript
Core: Data Structures & Algorithms (DSA), OOPs, Algorithm Design, Complexity Analysis
Web: React.js, HTML, CSS, REST APIs, Responsive UI
ML/Data: Scikit-learn, TF-IDF, NLP, Data Preprocessing
Databases & Systems: SQL, DBMS, Operating Systems, Computer Networks
Tools: Git, GitHub, FastAPI, Linux, Vercel, Render, Tableau, Power BI

Projects

CampusHub – College Life Management Platform <i>Team Project / Team size: 4 / Role: Frontend Developer</i> <i>Tech Stack: React.js, Context API, CSS, JavaScript</i> - Engineered multi-role SPA with 3 dashboards (student, admin, club) - Implemented 5+ core features including events, notes sharing, Q&A, and team formation - Managed global state across 15+ components using Context API - Designed responsive UI improving usability across multiple devices	Apr 2026
Fake Review Detection System – ML-Based Text Classification <i>Individual Project / Role: ML Engineer & Full Stack Developer</i> <i>Tech Stack: Python, Scikit-learn, TF-IDF, SMOTE, FastAPI, React.js</i> - Built an end-to-end machine learning system to classify fake vs genuine reviews on a 40K+ dataset - Designed preprocessing pipeline improving data quality and feature extraction for 40K+ samples - Applied TF-IDF vectorization and SMOTE to handle class imbalance effectively - Trained and evaluated multiple models; achieved F1-score of 0.91 and ROC-AUC of 0.97 - Deployed FastAPI backend and integrated with React frontend	Apr 2026
FarmFusion – Smart Agriculture Decision Support System <i>Smart India Hackathon / Team Size: 6 / Role: Frontend Developer & Data Integration</i> <i>Tech Stack: React.js, HTML, CSS, JavaScript, IoT Sensors, REST APIs</i> - Built a web-based platform analyzing real-time data from 5+ IoT sensors for agricultural insights - Integrated weather APIs to provide soil and climate-based recommendations - Developed responsive frontend across 5+ modules ensuring usability across devices - Collaborated in a 6-member team using Git and improved system reliability through debugging	Sep 2025

Certifications

Develop Solutions for Microsoft Azure – Microsoft Learned to design, build, and deploy scalable cloud-based solutions on Azure	Jun 2026
Cybersecurity Essentials – Cisco Networking Academy Covered network security fundamentals, common threat types, and basics of cryptography	Jun 2026
AWS Certified Cloud Practitioner – AWS Covered 15+ services (EC2, S3, IAM), cloud fundamentals	Feb 2026
Oracle Academy – Database Programming with SQL Practiced 25+ SQL queries (joins, normalization)	Dec 2025
Software Engineering Job Simulation – Deloitte (via Forage) Solved software engineering problems using SDLC and Git workflows	Jun 2025
